Allowable Subject Matter

Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance:

The independent claims recite, "determining inverse values of the determined absolute values of the current vectors; digitally filtering using several of the inverse values to determine Fourier coefficients of a first harmonic of the determined inverse values; and computing with the determined Fourier coefficients the rotor position of the synchronous motor". This feature in combination with the remaining claimed structure avoids the prior art of record.

U.S. Patents 6,762,573 to Patel, 6,401,875 to Marvin et al., and 6,388,420 to Jansen et al. teach rotor position estimating methods, but do not teach the disclosed method, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen J. Cherry whose telephone number is (571) 272-2272. The examiner can normally be reached on M-F 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Barlow can be reached on (571) 272-2269. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
